# Quality of written communication questions

- Explain how evolution occurs via natural selection.
- You will be able to indentify which questions you will get marked on your quality of written communication because you will see this or a similar instruction:
- ***In this question you will be assessed on using good English, organising information clearly and using specialist terms where appropriate.***

# Identify at least 5 scientific key words

For example.

- Survive
- Genes
- Offspring
- Population
- Variation
- Reproduce
- Mutations

Can you order the key words to allow  
you to make a mini plan

1. Variation
2. Mutations
3. Survive
4. Reproduce
5. Genes
6. Offspring
7. Population

# Model answer

- There is variation between member of the species this is caused by mutations in genes. Those individuals who are most suited to the environment are the ones who are most likely to survive and pass on their genes to their offspring. This will mean that the population of individuals with this favourable characteristic will increase.

Always remember to Proof read your work

Underline key words as you use them to highlight your good use of scientific vocabulary
